## An example prolog

Put your short description here; used for first paragraph, previews, and summaries.

The actual content goes here

---

## Simple topic

This topic demonstrates some basic elements of DITA content.

### Exercises in content markup

This is a paragraph. This is a phrase with a keyword.

Simple lists have minimal content.

Each item should be only a single line.

- This is a sentence.
  - This is fragment of code.
  - This is another paragraph.
1. Item the first
  2. Item the second

### Term example

definition example

### Term 2

example 2

a complex table	Table → Insert → Row	with spanned cells
with spanned columns		

heading 1	heading 2
content 1	content 2

### Examples of markup

Text for a user to type.

An extended fragment of code  
with multiple lines

## A DITA concept

Put your short description here; used for first paragraph and abstract.

Type text here.

- an interesting point
- another interesting point

## A DITA reference topic

DITA reference topics provide details of some product feature or command.

## Syntax

something param1 *info*

param1	info1	a description
	info2	another description

## Creating DITA tasks

Put your short description here.

You need to do this first.

Here's why this task is important, whether it's risky, and so on.

1. Do this. It needs to be done first.
2. Then this:
  - a. Which is done by doing this.
  - b. And then this.

In order to accomplish something.

3. And finally, do this.

When you're all done, here's what you'll see.

Here's an example of how the task might be done.

Next, thing about doing other things.

---

## Linking topic

This topic demonstrates some basic elements of DITA linking.

Links follow the body.

### **Related information**

"An example prolog," on page 1

Put your short description here; used for first paragraph, previews, and summaries.

DITA on the XML Cover Pages

A list of resources including briefing materials such as these.

### **A titled list of links**

For links that are a structured part of the topic.
