## **Preface**

This document continues the work of the Open Applications Group Specification Teams since they were first formed in the fall of 1995. It reflects many hundreds of person hours contributed by the Open Applications Group, Inc. member companies.

These people represent the persons who are building, testing, and implementing the business applications thousands of companies are using world wide to run their businesses. Several customers and other members of the global software community have also contributed to this effort.

Release 7.2.1 of OAGIS is not the sum total of all of the interoperability points between business applications but it adds some important and exciting new enhancement to existing capabilities including enhanced e-Manufacturing, Invoicing, Customer, and Supplier Management. In addition, new integration scenarios were added as well as descriptions and explanations enhanced to make the specification easier to read and understand.

Several technical enhancements were included, including better support for XML, the rich meta data standard supported by the World Wide Web Consortium. The Open Applications Group is the largest publisher of business transactions in XML in the world today.

There is a great deal more work to be done and this document will continue to be updated. Much care has been given to make it as correct as possible. If you find any errors, or if you have any comments, please do not hesitate to contact us as indicated on the previous page of this document.

Since each chapter of this document represents a single file, the table of contents presents the components but consequently does not give specific pages numbers.

We here at the Open Applications group hope you will find this document useful.

Best regards,

**David M. Connelly**

President,  
Open Applications Group, Inc.

# **TABLE OF CONTENTS**

---

## **Net Change for Release 7.2.1**

### **Section One – General Topics**

1. Business Object Document Architecture
2. XML Architecture

### **Section Two – Integration Scenario Diagrams**

1. General Ledger to Sub-Ledgers
2. General Ledger to Budget
3. Order Management to Accounts Receivable - Credit Management in Accounts Receivable
4. Order Management to Accounts Receivable - Credit Management in Order Management
5. Order Management to Accounts Receivable – GL Posting from Accounts Receivable
6. Order Management to Accounts Receivable – GL Posting from Order Management
7. Purchasing to Accounts Payable – GL Posting from Accounts Payable
8. Purchasing to Accounts Payable – GL Posting from Purchasing
9. Project Accounting Synchronization
10. Feeder applications to Project Accounting
11. Human Resources to Manufacturing, Financials, and Time and Attendance
12. Purchasing and Sales Force Automation to Order Management
13. Plant Data Collection/Warehouse Management – Cycle Counts
14. Plant Data Collection/Warehouse Management – Issues
15. Plant Data Collection/Warehouse Management – Inventory Transfers
16. Plant Data Collection/Warehouse Management – Receipt of Goods
17. Plant Data Collection – Production Orders
18. Plant Data Collection – Work in Process Confirmation
19. Plant Data Collection – Shipping
20. Plant Data Collection – Time and Attendance
21. Manufacturing to Purchasing – Receiving and Inspection in Manufacturing, Push Model
22. Manufacturing to Purchasing – Receiving and Inspection in Manufacturing, Pull Model
23. Manufacturing to Purchasing – Receiving and Inspection in Purchasing, Push Model
24. Manufacturing to Purchasing – Receiving and Inspection in Purchasing, Pull Model
25. Manufacturing to Order Management – Financials with Logistics, Make to Order, Build to Order
26. Manufacturing to Order Management – Financials with Logistics, Engineer or Configure to Order
27. Manufacturing to Order Management – Financials with Logistics, Mixed Mode
28. Manufacturing to Order Management – Financials with Manufacturing, Make or Build to Order

29. Manufacturing to Order Management – Financials with Manufacturing, Engineer or Configure to Order
30. Manufacturing to Order Management – Financials with Manufacturing, Mixed Mode
31. Invoice Matching - Matching in Purchasing, Invoices entered in Purchasing
32. Invoice Matching – Matching in Purchasing, Invoices entered in AP, Push Model
33. Invoice Matching – Matching in Purchasing, Invoices entered in AP, Pull Model
34. Invoice Matching – Matching in Accounts Payable, Invoices entered in AP, Push Model
35. Invoice Matching – Matching in Accounts Payable, Invoices entered in AP, Pull Model
36. Synchronize Sales Order for Shipping Applications
37. Sales Force Automation to Order Management - Updating orders with Order Management
38. Sales Force Automation to Order Management - Inquiring on orders in Order Management
39. Sales Force Automation to Order Management and Shipping
40. Supply Chain Integration - Manufacturing to Purchasing, Order Management, Billing, Shipping, and Financials
41. Customer Service Integration - Field Service, No Returns
42. Manufacturing to Order Management - Financials with Manufacturing - Make to Order With Credit Checking
43. Manufacturing to Purchasing - Receiving & Inspection in Manufacturing, Request/Reply Model
44. Production Synchronization - Publish and Subscribe
45. Production Order Integration
46. Production Routing Synchronization Integration
47. Human Resources to Manufacturing
48. Human Resources Integration to Time Card Data Collection
49. Engineering Change Integration
50. ERP to Finite Scheduling Integration
51. Maintenance Management with Maintenance Orders
52. eCatalog - Catalog Exchange
53. eCatalog - Pricelist Exchange
54. Item Unit of Measure Synchronization
55. RFQ & Quote – Buyer and Supplier; Quantities of Finished Items, Custom Built to Order Items, Exchange through Intermediaries
56. Forecast - Exchange
57. Production to Manufacturing Execution
58. Supply Chain Execution
59. Invoice Scenario
60. Consumption Scenario

## Section Three – Detail Chapters of BOD Definitions

The following lists the Open Applications Group Integration Specification BODs and their current revision numbers as of Release 7.2.1. This Release builds on the work that was introduced in the previous releases, and introduced new BODs 183 through 201. In the following table the BODs that have been modified for Release 7.2.1 are highlighted in gray.

**Please Note:** A usability hint for these tables. You may copy these tables onto a single page and then print it out for a one page BOD short hand for finding the BOD you require. These tables can also be sorted by Verb, Noun, or by Chapter Number for ease of use in finding the BOD you need.

VERB	NOUN	CHAPTER NUMBER	REVISION NUMBER
Post	Journal	1	006
