Title : Liaison Statement to OASIS Right Language Technical Committee

WG11 (MPEG) would like to inform the OASIS Right Language Technical Committee (RLTC) that we are recommending that a Class C Liaison be established in answer to your request. This recommendation has been forwarded on to SC29 for formal approval and processing.

Given that our two organizations are pursuing very similar work, we would like to inform the OASIS RLTC that MPEG has produced a Committee Draft (CD) of the MPEG-21 REL (please find this document attached).

WG11 has also developed a new schema approach for including the ISO country codes and currency codes which you will find in the CD. We would recommend that you consider this approach in the OASIS work.

Attachment:

- Committee Draft (CD) of the MPEG-21 REL (N4942)
