Standards Registry Metadata Definition, v2.0							
(using Dublin Core 1.1 attributes)							
Name	Identifier	Definition	Comment	Datatype	Obligation	Maximum Occurrence	Mapping to Dublin Core v1.1
Document number	DocumentNumber	An unambiguous reference to the document.	Free-form structure to allow for varied syntax	Character String	Optional, unless there is no document title	Once	Identifier (could be the URI to the resource)
Document title	Title	Name by which the resource is formally known.		Character String	Mandatory	Once	Title
Scope/abstract/problem space	Scope	Extent or scope of the document content.		Character String	Optional	Once	Description.A bstract
SDO acronym	SDOAcronym	Acronym of the standards developing organization primarily responsible for developing the content of the document.	To provide for identical Acronyms for different organizations, the full title of the organization should be used with acronym following in parenthesis if available. Note that some organizations use only their acronym, such as ASTM.	Character String	Mandatory	Once	Creator or Publisher
SDO's Committee/subcommittee/working group	SDOCommittee	Name of committee, subcommittee, working group	Free-form structure to allow for varied syntax	Character String	Optional	Once	Creator or Publisher
Resource	Resource	Reference to a related resource, in this case to further information on SDO (scope, contact information, etc.)	URI. Eliminates inclusion of specific contact data as metadata elements.	Character String	Optional	Once	Relation
Taxonomy/classification	Classification	Classification scheme and code(s) that describe a topic of the document.	Self-declared, not developed/maintained by StandardsReg Committee. Recommended best practice is to select a value from a controlled vocabulary or formal classification scheme. Need provision to cite both scheme used and the specific classification identifier.	Character String	Optional	Unlimited	Subject with SCHEME Qualifier (Diffuse, ICS?)
Keywords	Keywords	Key phrases that describe the topic of the document.	Self-declared.	Character String	Optional	Unlimited	Subject

Identifier	Definition	Comment	Datatype	Obligation	Maximum Occurrence	Mapping to Dublin Core v1.1
CurrentStatus	Current document development status. Four stages: "Project Initiation" (no draft available), "Draft Available" (draft available for comment), "final approval" (final approvals), and "published" (final approved version available for distribution)		Character String	Mandatory	Once	Type with Private SCHEME Qualifier
DateofAction	Date that document achieved current status.	History showing dates of previous actions not retained.	Date, YYYY-MM- DD	Optional	Once	Date.MostRe centAction
ReferencedStnds	Standards referenced in Normative References section of document.		Character String	Optional	Unlimited	Relation.Refe rences
SupercededStnds	Standards most recently replaced by this document.		Character String	Optional	Unlimited	Relation.Repl aces
PreviousVersions	Standards previously replaced by this document.		Character String	Optional	Unlimited	Relation.IsVe rsionOf
Format	The physical or digital manifestation of the document.	Format may include the media-type or dimensions of the resource. Format may be used to determine the software, hardware or other equipment needed to display or operate the resource. Examples of dimensions include size and duration. Recommended best practice is to select a value from a controlled vocabulary (for example, the list of Internet Media Types [MIME] defining computer media formats).	Character String	Optional	Unlimited	Format
	DateofAction ReferencedStnds SupercededStnds PreviousVersions	CurrentStatus Current document development status. Four stages: "Project Initiation" (no draft available), "Draft Available" (draft available for comment), "final approval" (final approval in series of approvals), and "published" (final approved version available for distribution) DateofAction Date that document achieved current status. ReferencedStnds Referenced stricts Standards referenced in Normative References section of document. SupercededStnds Standards most recently replaced by this document. Bate (final approval) (final appr

NOTES						
The following attributes are curr		element:				
Version: same as version of meta						
Registration Authority: to be deter	mined					
Language: en (English)						
The following elements were eli	minated since v1 Fr					
The following elements were en	illinated Since v1.5.					
Project initiation date	ProjInitDate		Replaced by Action Date			
Approval date	ApprovalDate		Replaced by Action Date			
Publish date	PublishDate	Date final approved document made available for public distribution	Replaced by Action Date			
Equivalent standards	EquivStnds		Definition too ambiguous and therefore misleading			
Price	Price		Too unstable			
Available from	AvailableFrom		Should be covered by Resource. Could be used for non-digital form, but resource could provide info on this as well.			
Committee Contact name	ContactName		Replaced by Resource			
(SDO Contact Table)						
SDO name	SDOName		Replaced by Resource			
SDO acronym	SDOAcronym		Replaced by Resource			
SDO address	SDOAddress		Replaced by Resource			
SDO phone	SDOPhone		Replaced by Resource			
SDO fax	SDOFax		Replaced by Resource			
SDO E-mail	SDOEmail		Replaced by Resource			
SDO URL	SDOURL		Replaced by Resource			
SDO Contact	SDOContact		Replaced by Resource			
Attribute Definitions						
Name: the label assigned to the da	ata element					
Identifier: the unique identifier ass		- becomes the tag nam	ne in XML?			
Definition: semantic concept; a sta						
Comment: a remark concerning th						
Datatype: indicates the type of dat			element.			
Examples of datatypes: Charact	ter, Ordinal Number, Integ	er, Character String	sent (contain a value). Mandatory, Conditi	ional, or Optional		
Maximum Occurrence: indicates a			(12.2.1), (2.2.1)			
Version: the version of the data el		,				
Language: the language in which		ied				
Registration Authority: the entity authorized to register the data element
